

Sample PDF Document

Chapter 1: Introduction

This is a sample PDF document created to demonstrate PDF extraction and summarization. The content here is for illustration purposes.

Chapter 2: Content

This chapter contains some sample content that will be extracted and processed. The aim is to showcase how text from a PDF can be split, embedded, and summarized using various Python libraries.

Chapter 3: Conclusion

In conclusion, creating and processing PDF documents in Python is quite straightforward with the right libraries.
