    Holy Rosary School, Porumamilla

    CGPA:9.2

Skill Set

➢ Languages: C ,Java, Python, C++
➢ Web Technology: HTML, CSS, JavaScript(JS)
➢ Frame Work: ReactJS
➢ Database: MySQL

Projects Handled:

Project # 01

Title : Wedding Book
Duration: April 2023– May 2023
Role : Frontend Developer
Tool: Visual Studio Code

Description: The interactive flip book is digital book that allows users to flip through pages as if they were turning the pages of a physical book. Each page contains an image and a personalized message, creating a unique and immersive experience. This project is perfect for special occasions such as anniversary, birthdays, or any event where a personal touch is appreciated.

Roles:

➢ Interface is created by analyzing width and height of the book then gathered all images required for it.

➢ Using CSS adjusted all the sizes of the images and then designed using conic-gradient property.

Project # 02

Title: Exam-Portal
Duration: Nov 2023 – April 2024
Role: Frontend Developer
Tool: Visual Studio Code

Description: The aim of designing an exam portal is to create an interactive, user-friendly platform that facilitates the administration, participation, and evaluation of exams. This portal should provide a seamless experience for both test-takers and administrators, ensuring efficient management of quiz questions, real-time answer processing, and immediate result generation.

Roles:

➢ Building and structuring the React components, implementing the user interface, and ensuring a smooth user experience.

➢ Managing the application's state to handle user interactions, quiz progress, and result calculations effectively.

➢ Setting up React Router to enable seamless navigation between different components of the portal.

➢ Identifying and fixing any issues to ensure the portal runs smoothly and reliably.

Areas of Strength:

Good knowledge on Frontend Development.
